

The aim is to encourage your customers and colleagues to build a long-term, sustainable relationship with your brand and the products they receive from you. We hope to inspire you with this collection full of environmentally as well as budget-friendly tips, hands-on ideas and new exciting products.

# CONSCIOUS PROMOTIONS TO CONVEY YOUR MESSAGE

Outlining our commitments towards delivering quality products and services in a responsible and sustainable way, we strongly focus on the continuous introduction of green options of the essential must have items whilst reducing unnecessary stress on both people and the planet. We have dramatically increased the use of recycled and renewable materials to avoid unnecessary waste.

The pictures of the items reproduced in our catalogue are not contractual. We reserve the right to change without notice the product and packaging specifications or colours of any item mentioned in this catalogue.

# be Conscious

while creating a greater exposure

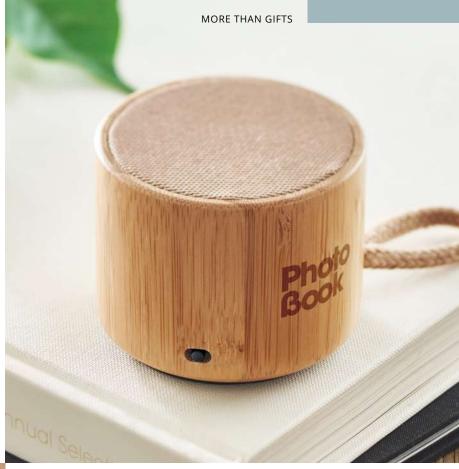

Happiness comes through connecting. A conscious choice for branded useful everyday items will create the most significant impact. Aligned with the growing need to support recycling and reutilization, we continuously re-examine the way we approach our product selection. Promotional products which are useful and desirable are reused and often retained for years. Your branding will remain fresh and relevant for your customers, with ongoing positive reminders to use your products or services again.

# RESPONSIBLE SOURCING AND PRODUCTION

All products are produced in a responsible way and comply with the requirements under European laws and regulations. Choosing more sustainable materials has been an essential factor during the development of this new collection.

#### SUSTAINABLE SOLUTIONS

By strongly reducing the use of virgin plastic and rethinking the most efficient way to pack the goods, both individually and for onward distribution shipment, we can reduce waste and influence our environmental footprint.

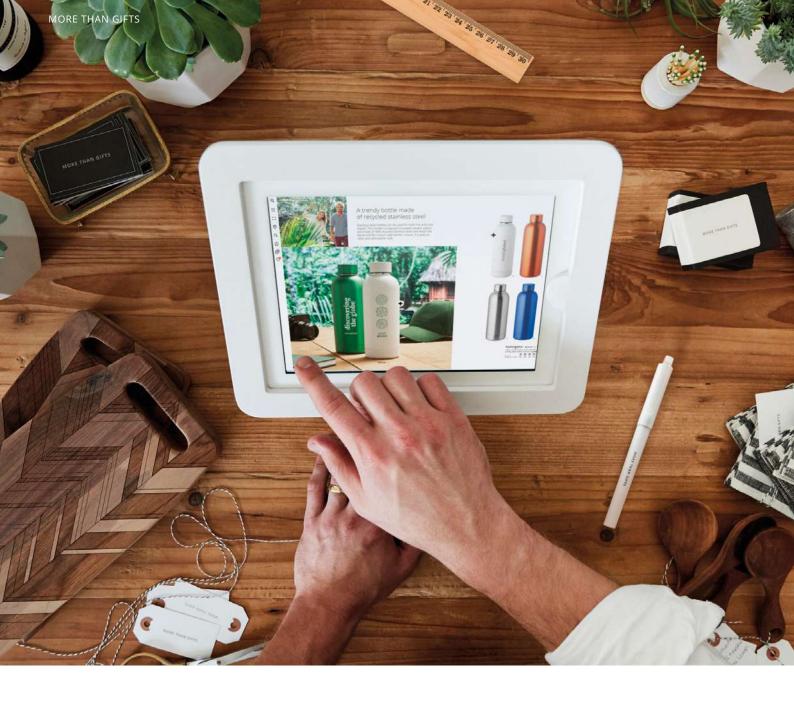

# KO STAINABLE STA

### SOCIAL RESPONSIBILITY AND SUSTAINABLE PRINTING

During production and printing we focus on creating a safe and positive working environment. All items are well-constructed, tested and produced with compliant and safe materials. Our printing process requires the safe use of all production inputs, such as chemicals and the control of all production outputs and emissions.

# Printing Techniques

Having your logo printed with the widest range of printing techniques has never been so easy. These are the main techniques used to print your logo.

## Digital printing 360

Compared to round screen, it is possible to print full colour, vivid images. UV ink technology does not emit volatile organic compounds (VOC) to the atmosphere. When combined with white underprint - possibilities are limitless on transparent objects.

## Laser engraving 360

Next level for inkless decoration, now possible on cylindrical products. Compared to conventional engraving, engraving area is limited by circumference of cylindrical object. Can be used on mugs with handles. Best results on natural materials (metals, wood, bamboo, etc.).

#### Sublimation

Printed with special inks on transfer paper, transferred to material using high temperatures. Known for photographic quality of printed images, as well as vivid colours and accuracy of small details. Requires white background for best results and polyester material or polyester coating.

## Doming

Digitally printed full colour label on self-adhesive polymer foil, covered by a thick layer of transparent epoxy resin, which both protects the image, as well as giving a premium, glossy look and finish.

## Digital Label

A flexible way to brand various products in almost any shape, self-adhesive polymer foil will fit in positions not accessible by other print techniques.

## Digital Printing

UV (VOC free) flat bed inkjet technology allows you to print vivid full colour images on various materials - artificial and natural. Compared to Digital printing 360 - this technique requires flat, rigid products. White underprint extends possibilities on transparent materials.

## Digital inlay

Xerographic full colour print on paper is a perfect way to convey message to Your customer. This technique is best for text and images, can be used for example: as a manual or "Thank You" notes or items where this is the only option available.

## **Button printing**

Best way to stand out from the crowd with this full colour button. Printed using xerographic technology on paper, assembled with glossy finish to give premium look.

#### Digital Transfer

Technique of digitally printed image on carrier foil with heat activated glue, applied with high temperature and pressure. Advantage of this technique is full colour photographic quality of image and sharp details. Gives a premium look and feel, especially on textile materials.

## Screen transfer

Conventional way of indirect printing using screen print. Can be applied on materials and places, where direct screen printing is not possible, in addition up to 8 different colours can be used on one image. Special colours available.

### Ceramic transfer

Technique of printing image using special inks on paper, transferred to the item using water film and heated in extreme temperatures to assure durability. Special colours available. Recommended for ceramic materials.

# Screen printing

Image exposed on to a screen mesh, through which ink is squeezed on to the marked surface. Main advantage of this technique is its large printing area on flat surfaces, on almost any material, along with possibility to use special colours. First choice for textiles. Maximum of 4 colours in one image. Special colours available.

## Pad printing

Image transferred to products surface from engraved cliché by silicone tampon. Most versatile indirect marking technique on almost any rigid shape and material. Maximum of 4 colours in one image. Special colours available. Cost efficient technique on small items.

### Round screen printing

Evolution of screen printing which allows this print method on to cylindrical and conical products. Compared to pad printing, this technique allows for a much bigger printing area. Can be used on mugs with handles. Maximum of 1 colour. Special colours available.

## Debossing

The engraved metal stamp is heated and is pressed against the material creating a permanent depression in the shape of the customer's artwork. Best results can be achieved on leather, PU, cardboard materials, like notebooks, organizers.

## Embroidery

Computerized stitching allows complex artworks being sewn in the material, creating premium and permanent marking. Glossy effect. Maximum of 8 colours in one image. Possible on textile materials like bags, t-shirts, jackets, etc, as well as caps.

## Laser engraving

Marking is permanent, by selectively removing microscopic layers of material, thus creating visible marks on the surface. Colour varies depending on processed material. Best results on natural materials (metals, wood, bamboo, etc.).
